

BIOCENTA AQUEUX
Code EV-1101

BIOCENTA is a plant equivalent of animal placental extracts. This plant placenta is produced in the heart of young buds and nourishes the fruit of the plant during its growth phase.

Properties and uses

BIOCENTA is an ideal active ingredient for anti-aging care formulas. It regenerates and invigorates the skin by stimulating cell renewal, it improves the oxygen supply to our cells and increases skin protein synthesis.

BIOCENTA can also be used in hair care formulas intended to treat weakened hair. Rich in bio-stimulins, BIOCENTA stimulates the micro-circulation of the scalp and accelerates keratogenesis (hair formation). It therefore promotes hair regrowth while fighting against dandruff.

BIOCENTA AQUEUX
Code EV-1101**SPECIFICATIONS****ORGANOLEPTICS CHARACTERISTICS**

Appearance	Liquid
Color	Pale yellow to dark yellow
Odor	Characteristic

PHYSICO-CHEMICALS CHARACTERISTICS

Solubility	Water soluble
Ph	6,0 – 7,0
Dry matter	> = 1,5 %
Protéins	> = 0,7 % on dry
Preservatives	Sorbate de potassium : 0.5 % Benzoate de sodium : 0.5 % Acide citrique : 0.05 %

BACTERIOLOGICALS CHARACTERISTICS

Aerobics germs	< 100 Germes / ml
----------------	-------------------

RECOMMENDED USE CONCENTRATION

5 à 10 %

STORAGE CONDITIONS

Conserver dans l'emballage d'origine, à l'abri de la lumière, à une température comprise entre 10 et 25°C
